FOR IMMEDIATE RELEASE

RHUB Launches Channel Program for Web Conferencing Solutions in Asia *Signs Strategic Alliance with Technology Link Corporation*

Santa Clara, CA, October 15, 2007 — RHUB Communications, Inc. (RHUB), a premier provider of Web conferencing solutions focusing on ease-of-use, affordability, security, and reliability, announced the launch of its channel program in Asia through a strategic alliance with Technology Link Corporation (TLC) of Japan. Under the terms and conditions of the agreement, TLC will offer RHUB's on-premise TurboMeeting appliances, pre-configured with the Company's proprietary TurboMeeting software, for a standalone solution that combines key Web conferencing applications in one package. The alliance includes the development of a Japanese language version of TurboMeeting, which is scheduled for availability in January, 2008.

"Our partnership with Technology Link is an important strategic move towards penetrating the Asian market," said Larry Dorie, CEO of RHUB Communications. "The Asia-Pacific region represents an enormous untapped market for Web conferencing products and services. According to analyst research, 25% of that market is for on-premise solutions, which are RHUB's specialty."

TurboMeeting elevates Web conferencing by its unique ability to support both fully interactive and view only attendees in the same meeting, between PC and Mac. With TurboMeeting, users can share information from one computer or among many. Users can also remotely control and support other computers and access one computer from another. TurboMeeting applications include:

- *Web Conferencing:* Web-based interactive meetings
- *Remote Support:* with remote reboot capability
- *Remote Access:* remote access to computers at home or office from anywhere, anytime
- *Web Seminars:* non-download results in quick (in seconds), easy (URL only) and the most reliable way for large groups of attendees to join meetings

“Web conferencing is increasingly viewed by more enterprises as an integral part of their communications infrastructure, but every business has its own unique requirements for real-time collaboration,” said David Coleman, Founder and Managing Director of Collaborative Strategies. “RHUB’s TurboMeeting extends real-time collaboration beyond conventional Web conferencing solutions by combining multiple collaborative functions to help satisfy Web conferencing requirements for a wide range of users, from small businesses to global enterprises.”

“We are excited about the opportunity to introduce a full-featured Web conferencing appliance to the Asian market,” said Joji Tone, President of Technology Link Corporation. “We evaluated many different solutions, and selected RHUB’s TurboMeeting because it offers many advantageous features such as remote support, remote seminars, and remote PC access.”

RHUB’s on-premise TurboMeeting Web conferencing appliances are available in capacities that serve SMBs to global enterprises, and come with a one-year warranty for hardware and software. After the first year, an extended warranty at 20% of the retail price per year is available. Product updates are performed automatically, and add-on licenses are distributed via the Web. For more information on how to become an RHUB channel partner, contact RHUB at 888-633-8155, info@rhubcom.com, or visit www.rhubcom.com.

About Technology Link Corporation

Technology Link Corporation (TLC) was established in 1994, to develop and market products related to computer, communication, and hi-tech electronics. TLC is presently specialized in CTI and VoIP products, marketing CTI adapters, CTI boards, call recording boards, SIP phones, and gateway products to the SI companies in Japan. To utilize these CTI and VoIP components, TLC also develops and provides application software to its SI customers. TLC is privately owned, and headquartered in Yokohama, Japan. For more information, please visit http://www.link-corp.co.jp/e_index.html.

About RHUB Communications

RHUB is a premier provider of on-premise Web conferencing appliances, based on the Company’s TurboMeeting software, that meet the needs of any organization. The Company’s end users total over 5,000 in a variety of market segments including services, manufacturing, and government. RHUB’s on-premise Web conferencing appliances focus on criteria of the highest importance to users: ease-of-use, affordability, security, control, and reliability. RHUB’s breakthrough View-Only technology enables users of any platform to join meetings by a browser, requiring no download. With a small footprint, and power draw of only 4.5 watts, RHUB’s on-premise Web conferencing appliances are the perfect choice for organizations seeking to improve their environmental credentials. RHUB is privately-owned and headquartered in Silicon Valley, California. For more information, visit www.rhubcom.com.
