

**FOR IMMEDIATE RELEASE**

**RHUB COMMUNICATIONS APPOINTS PAUL LACHANCE  
AS VICE PRESIDENT OF SALES**

**SAN JOSE, CA, SEPTEMBER 1, 2015** - RHUB Communications, Inc., a leading provider of [video conferencing](#), [web conferencing](#) and [remote support](#) technologies, today announced that it has appointed Paul LaChance as their new Vice President of Sales. LaChance will oversee the company's sales strategies, as well as develop new business initiatives for advancing RHUB's award-winning 6-in-1 TurboMeeting appliance.

"Paul has an extensive background in sales with both emerging and established technology providers, which gives him the unique ability to effectively maximize growth opportunities for our company," said Larry Dorie, CEO of RHUB Communications. "He is a critical asset in helping us to continue to drive momentum in the business collaboration technology sector."

Prior to his new position with RHUB, LaChance served as Director of Business Development for CTV Co., where he created international sales and consulting relationships between domestic clients and off-shore technology providers. Additionally, early on in his career, he served as General Manager of the Transportation Business Unit at ILOG<sup>®</sup>, Inc. Under his new role, LaChance will be working to expand domestic and international sales for RHUB's innovative TurboMeeting solution.

TurboMeeting is a 6-in-1 web, audio, video conferencing and remote support server that companies can own and control – with unlimited users and no monthly fees. The solution delivers a comprehensive suite of features including...

1. **Web Conferencing** – Give sales presentations, product demos, and collaborate interactively.
2. **Audio Conferencing** – VoIP based audio conferencing and free landline audio conferencing services.
3. **Video Conferencing** – Multi-point webcam based video conferencing. ***New Enhancements Coming Soon!***
4. **Webinars** – Provide online seminars without the need for view-only attendees to download anything.
5. **Remote Support** – Support PC and Mac users remotely.
6. **Remote Access** – Access your office or home PCs from anywhere, anytime.

"We are looking forward to experiencing all of Paul's strategic ideas for getting our technology into even more enterprises that are looking to deploy a "next generation" web conferencing solution," Larry added.
